

PVP

Innovation drives quality. Worldwide.

PVP TIRE ACCEPTANCE

We work for a clean and
sustainable future

● ● ● DO'S AND DONT'S

Do's

- Car, motorcycle, truck and pick-up tires — without rims
- Clean, single-grade, EU-approved (REACH Regulation), Rollable condition, No older than eight years

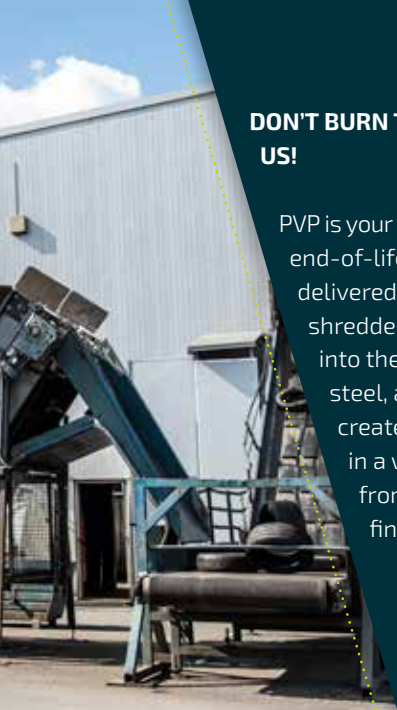

Dont's

- Tires with rim
- Tires with sealing Technology
- Diagonal and solid rubber tires
- Inner tubes
- Tires with a diameter exceeding 1.40 m
- Burnt and foam-filled tires
- Tires without tread
- Double or tripled tires

DON'T BURN TIRES — RECYCLE THEM WITH US!

PVP is your reliable partner for sustainable end-of-life tire recycling. The used tires delivered to our facilities are carefully shredded, granulated, and separated into their core components: rubber, steel, and textile fibers. This process creates high-purity rubber fractions in a wide range of particle sizes — from coarse rubber granules to fine rubber powder.

VERSATILE APPLICATIONS

Recycled tire rubber can be reused across a wide range of industries and applications — particularly in the acoustic engineering and construction sectors.

CLEAN TIRES – BETTER TIRE RECYCLING QUALITY

All used tires delivered to PVP are recycled.

It is important that the tires are as clean as possible so that the recycled rubber product can be used as an environmentally friendly alternative to natural rubber.

IMPORTANT INFORMATION FOR TIRE ACCEPTANCE

All tire deliveries must be registered in advance with our contact person.

PVP does not accept tires with rims or self-sealing tires. Other types of rubber, tires, or waste materials are also not accepted. If such materials are identified upon delivery, a fee will be charged per item. Any additional sorting and disposal costs will also be charged to the supplier.
